Ritelam Textiles Private Limited

Technical Textile Division

Progressive Textiles

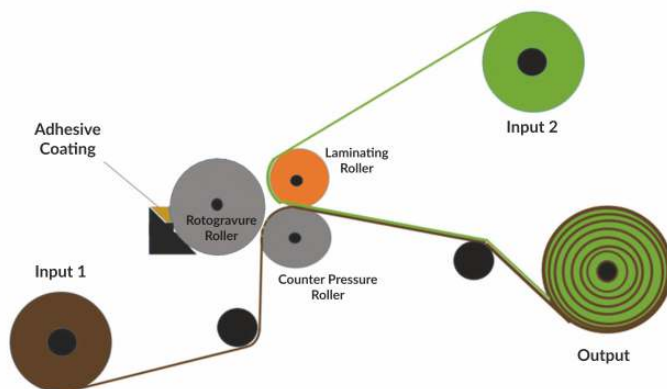

Mission

To achieve a crowning status in the rapidly growing technical textile industry by consistently delivering excellent manufacturing & lamination services, which add to the value of the product and build customer confidence.

Ritelam Textiles Private Limited was established in 2019 to provide Textile Lamination Services in India. The company started its operations in Tamil Nadu under the competent management of Mr. M. Kannan & Directors. Together, they aspire to add value to the technical textile industry, by scaling up the functional efficiency of textiles, pertaining to its diverse applications in the current scenario

Textile Lamination Technique and Procedure

Textile Lamination is a significant technology that increases the efficiency and functionality of technical textiles by joining together one or two substrates with a bonding material like adhesive and film. Fabrics are laminated with a suitable base material or substrates like PU / PTFE / PVC / NON WOVENS membranes with the help of advanced technology and adequate machinery.

Advantages of Textile Lamination

- Product protection & preservation against external elements, wearing, and deterioration.
- Increases durability & longevity of the product by retaining its originality and creating water-resistance with breathability.
- Ease of maintenance with the simple cleaning process.
- Application enhancement of the product.
- Utmost protection for fragile fabrics.

Textile lamination services are widely used in various sectors like Home textiles, Foot wear, Automotive, Sports & Leisure, Luggage, Upholsetry, Work wear, Technical apparel, Medical & Hygiene, Interiors, to name a few.

What do we offer

Always taking into consideration the diverse needs of our customers, we offer fabric production in the wide array of Woven, Knitted, Leather & non-woven textiles and their corresponding lamination services in a customized paradigm.

Our Products and Applications

- Bed protector/baby dry sheet (Promatt)
- PU moulded cups for lingerie application
- Shoes inner layer lining applications
- High altitude winter wear jacket fabrics used at -40Degree temperatures
- Home textiles - Table cloth, Block out curtains, Anti slip matt ,etc
- Viral Resistant Surgical aprons, masks, etc.
- Reusable diapers
- Bonded fabric for Apparels.
- Water-proof resistant tarpaulins, covering, tents.
- Automobile & interior upholstery
- Activated carbon fabrics for filter & mask applications.
- High performance outer wear like mining, military, fire fighter, industrial wear etc.

We specialize in superior fabric lamination services for steadfast and extensive applications in industry. We use moisture cured reactive poly urethane adhesive for lamination to set up high-quality standards right from the line to finishing stages.

Why Ritelam?

Ritelam has established excellent quality standards for all its products and services by employing the finest raw materials, techniques and measures.

- Strong control tests at every phase,
- Best quality membranes and adhesives available worldwide,
- State-of-the-art technology,
- Cost-effective products,
- Highly adept and experienced staff
- Production width Min 1200mm to Max 2400mm
- Capacity 10 Lakhs Meters per month.

We also specialize in in-house fabric manufacturing with an efficient production capacity.

Vision

To become a global performer in developing and laminating high-quality fabrics in the broad spectrum of multiple industries, while setting the highest business ethics and quality standards with all our stakeholders including suppliers, customers, employees, and the society at large.

Pro Matt™

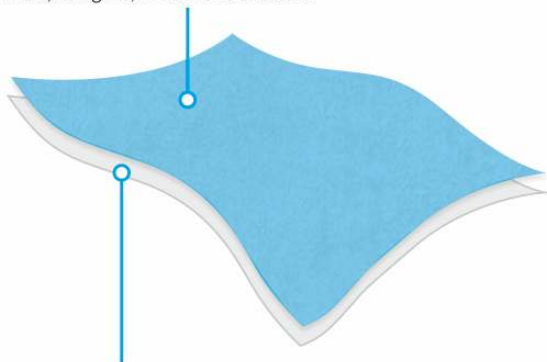

Mattress Protector

Promatt is a revolutionary product in the bed protection industry that offers unparalleled advantages in durability, comfort, and protection. The mattresses/pillow protectors provide functional utilities by virtue of several integrated features like water resistance, reusability, and breathability. They are primarily used to prevent liquid stains and have an anti-allergy barrier that protects against dust mites. Promatt has a significant and pragmatic application in the hospitality industry and for enuresis prone users, whether it be an adult or child.

Available in fitted and slip on form in various colours and sizes:

HYPOALLERGENIC

Hypoallergenic barrier protects mattress from dust mites, allergens, mildew and bacteria.

BREATHABLE MEMBRANE

Protects mattress from all fluids, including urine, perspiration and accidental spills
